# Povidone Antiseptic Solution 10%

Available in  
100ml, 250ml spray,  
500ml, 5000ml units

## Recommended place of use:

This solution is ideal for surgical hand washing, wound and burn disinfection, and surgical site disinfection. A concentrated state of 3-5 ml is sufficient for use. When preparing surgical areas, ensure the entire surface is covered with the film layer by applying it directly or using a cloth.

# Hydrogen Peroxide

Available in 100ml, 1000ml, 5000ml

## Recommended place of use:

It's an antiseptic solution for cleaning and disinfecting wounds and abrasions on the skin, stopping minor bleeding, cleaning earwax, bleaching blood stains, and various dental procedures. It's applied to the skin surface by showering the affected area.

## ECG Gel

Available in 250ml unit

### Recommended place of use:

ECG Gel is a versatile product used for ultrasound procedures, ECG tests, and other medical procedures. Its high viscosity and vacuum production make it safe for use with medical devices and does not harm the skin. It is water soluble, hypoallergenic, and safe for all skin types. ECG Gel is easy to clean, does not contain harmful ingredients, and has no toxic effects.

## EEG Paste

Available in 250gm unit

### Recommended place of use:

EEG Paste that is used in brain EEG procedures, helps electrode to easily adhere hair and provides conductivity.

## Ultrasound Gel

Available in 250ml units

### Recommended place of use:

Used for ultrasound, ECG procedures, cardiac stress tests, ECG electrodes, and epilation. Has high viscosity and vacuum technology production, doesn't harm devices, not affected by body salt, comfortable to use, hypoallergenic, non-irritating, water-soluble, easy to clean, no oil or oily substances, no formaldehyde or salt, non-toxic, odorless, suitable for all skin types.

# Hand Disinfectant

Available in 1000ml units

## Recommended place of use:

This product is used for personal hygiene and protection against the spread of infectious diseases in medical clinics, schools, public transportation, public places with frequent money exchange, and more. It is particularly useful in winter months. It is effective for hand and skin hygiene after using equipment, and does not cause harm. It provides deep softness due to its nourishing ingredients.

# Hand Disinfectant Gel

Available in 50ml, 100ml, 500ml, 1000ml, 5000ml units

## Recommended place of use:

Use for personal hygiene and protection against infectious diseases in medical clinics, schools, public transportation, and other public places. Effectively cleanses hands and skin without causing harm, and nourishes skin with deep softness from nourishing ingredients.

# Foam Disinfectant

Available in 1000ml units

## Recommended place of use:

It is a ready-to-use product for fast disinfection in medical settings, transport vehicles, dental equipment, and more. It is a concentrated product used for cleaning and pre-disinfection of various instruments and surfaces. It helps prevent dirt buildup and aids sterilization while also containing corrosion inhibitors. It is pH neutral and does not contain harmful chemicals like aldehyde, phenol, or phosphate. It can be used with manual and ultrasonic devices.

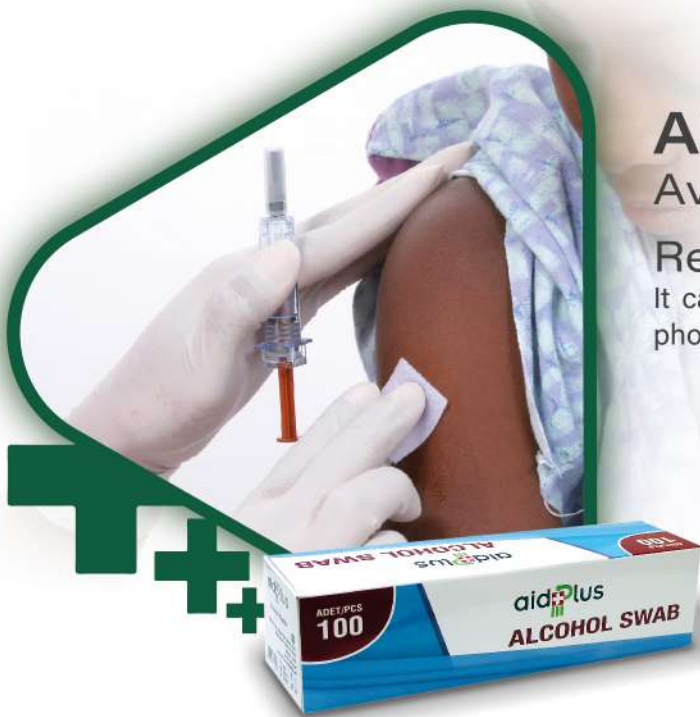

## Alcohol Swab

Available in 100pcs units

Recommended place of use:

It can be use to disinfect our hands and our items such as phones and computers that we constantly use.

## EDTA

Available in 250ml unit

Recommended place of use:

EDTA is a chelating agent used to simplify the instrumental treatment of root canals. It reacts with the mineral components of the tooth to soften the tissues and decalcify the canal walls. This allows for easier mechanical preparation of the root canal and removal of the smear layer, which opens dentin tubules and enhances cleansing. EDTA is used for root canal treatment and elimination of the smear layer, dentin mud, and release of dentin tubules.

## Chlorhexidine 2%

Available in 250ml units

Recommended place of use:

Used for the irrigation of the roots canals of the teeth.

## Formaldehyde 10%

Available in 1000ml units

### Recommended place of use:

It is used as a bacterial inhibitor in pathological examinations, morgues and on cadavers. It is used as an inhibitor in biopsy procedures.

## Nasal Drop/Spray

Available in 20ml units

### Recommended place of use:

It is used to normalize swellings if diagnosed, moisten the mucous membranes that progress along with common cold and flu infections and cause discomfort because of dryness inside the nasal cavities. Moreover, it is used for common cold, nasal congestion, hay fever, deviation and nasal dryness and nasal congestion of infants, to relieve the inflammation of nasal mucosa.

## Sodium Hypochloride

Available in 1000ml units

### Recommended place of use:

Sodium Hypochlorite is generally used in water for disinfectant purposes and as a bleaching agent in various sectors.

## Lice Shampoo

Available in 200ml units

Recommended place of use:

AQUA TOUCH lice shampoo is indicated for the eradication of head lice infestations.

## Lice Spray

Available in 120ml units

Recommended place of use:

Aqua Touch Spray is used for clean lice and nits from hair. It acts by closing the airways of lice and nits and keeping them airless.

## Solid Vaseline

Available in 100gm units

Recommended place of use:

Vaseline is a moisturizing product that is safe for most people to put on their face, relieve dry skin, treat diaper rash, and rehydrate nails.

## Glycerine Pure

Available in 35gm units

### Recommended place of use:

It is used as a moisturizer for hand and skin cracks. It is also used as an ear drop according to the doctor's recommendation.

## Aloe Vera Shower Gel

Available in 300ml units

### Recommended place of use:

100% pure aloe vera Panthenol, Allantoin deep and long lasting moisturization. Suitable to all skin type, ideal for sensitive skin. Safe to use for children. Aloe vera, natural botanical with proven skin hydrating, soothing and healing properties allantoin, moisturising. Reinforces the skin barrier function. Vitamin E, Anti-Oxidant to protect the skin from free radicals. Panthenol, humectant helping to moisturise the skin.

## Gentian Violet

Available in 25ml units

### Recommended place of use:

It is used in treatments such as thrush, vaginal yeast infections, fungal infections, wounds, hereditary skin conditions, immune skin reactions, and umbilical infections.

## Vaginal Douche

Available in 5mlx10pcs units

### Recommended place of use:

Vaginal douche is used as a vaginal cleanser for the treatment of vaginitis due to candidal, trichomonal, bacterial, non-specific, or mixed infections and for pre-operative disinfection of the vagina.

## Intim Foam

Available in 200ml units

### Recommended place of use:

It is used for the daily care and comfort for external genital area. Apply to the soaked skin, lather up and rinse thoroughly.
